## *Unique Features*

### LED LIGHTING
LED lighting products produce light up to 90% more efficiently than incandescent light bulbs. LED lighting is more efficient, versatile, and lasts longer.

### COLOUR TEMPERATURE & DIMMABLE
The main advantages of CCT (Colour changing technology) adjustable lights are that you're not stuck with one colour temperature and you can change it depending on the function of the room.

### INFRARED SENSOR
An infrared sensor helps to detect the movement of your hand and turn the LED lights on without an unsightly pull cord hanging down.

### LANDSCAPE OR PORTRAIT
The choice to place the mirror either in Landscape or Portrait format.

### HEATED DEMISTER PAD
Heated mirror demister pads ensure that your mirror remains crystal clear even in the steamiest bathrooms. Attempting to wipe away the steam is ineffective and only results in soiling the mirror, making it even more difficult to clean.

### IP44 RATING
A product that has a rating of IP44 means that it is protected against solid objects that are bigger than 1mm and water splashing from all directions.

### BLUETOOTH AUDIO
These bathroom mirrors with Bluetooth speakers enable you to connect your phone wirelessly, allowing you to stream music, radio, and podcasts while you shower.

### CHARGER SOCKET
These elegant and stylish mirrors will ensure you never get caught without power for your shavers and electric toothbrushes.

### TOUCH SENSOR
Touch sensor operated LED light.

### CONTACTLESS SENSORS
The mirrors have a smart contactless sensor so you can switch on/off your mirror without even touching it.
All it takes is a simple wave over the sensor.
