Tesla Radiator Element Control Plate

Technical Information –
The Tesla towel rail control plate is used to control the output of your towel rail element. The towel rail element can be wired directly into this control plate, in the bathroom.

This control gives you five increments of control, from 20% up to 100%, indicated by the LED lights. The 2 hour boost function switches the element to full power for 2 hours, then reverts to the previous setting. Optional chrome cover plate available.
